

**> A WELCOME FROM PAUL GREENWOOD,
RISK BROKER AND REGISTERED FINANCIAL ADVISER**

A skilled insurance adviser always acts on the client's behalf, assessing a situation, offering comprehensive advice and implementing tailor made solutions.

At Accent Insurance Brokers, we are constantly in the marketplace looking for great deals for our clients. We go beyond that, not only in matching the appropriate products and advice to our clients, but also scouring the fine print of each policy and wordings we find to make sure they are completely protected against all of life's contingencies – we worry about the detail, so our clients don't have to.

We use the latest technology for document storage and retrieval, which has transformed our business and made us even more responsive to the ever-changing needs of our clients.

Clients' understanding in the use of technology to make their financial decisions is becoming more and more common. We use up to date software for needs analysis all the way through to the client recommendation document, and can even include an electronic application with some companies. We also offer a limited advice process/solution if the client instructs us to do so.

As the Director of Accent Insurance Brokers, my reputation is on the line every time I make recommendations to clients. I stand 100% behind every policy and product I promote.

After two decades in the business, I am confident my team and I can fulfil your every requirement for top notch financial advice and excellent risk coverage.
